EXPERIMENTAL AND MOLECULAR PATHOLOGY

Published bimonthly at 35B New Street, Worcester, Massachusetts 01605 for Academic Press Inc., 111 Fifth Avenue, New York, N.Y. 10003. Editors: Frederick Coulston, Albany Medical College, Albany 8, New York and Wilbur A. Thomas, Albany Medical College, Albany 8, New York.
Owned by Walter J. Johnson, Thekla Johnson, and Kurt Jacoby, 111 Fifth Avenue, New York, N.Y. 10003.
Known bondholders, mortgagees, and other security holders owning or holding 1 percent or more of total amount of bonds, mortgages or other securities: None.
Paragraphs 2 and 3 include, in cases where the stockholder or security holder appears upon the books of the company as trustee or in any other fiduciary relation, the name of the person or corporation for whom such trustee is acting, also the statements in the two paragraphs show the affiant's full knowledge and belief as to the circumstances and conditions under which stockholders and security holders who do not appear upon the books of the company as trustees, hold stock and securities in a capacity other than that of a bona fide owner. Names and addresses of individuals who are stockholders of a corporation which itself is a stockholder or holder of bonds, mortgages or other securities of the publishing corporation have been included in paragraphs 2 and 3 when the interests of such individuals are equivalent to 1 percent or more of the total amount of the stock or securities of the publishing corporation.
Total no. copies printed, average no. copies each issue during preceding 12 months: 900; single issue nearest to filing date: 900. Paid circulation (a) to term subscribers by mail, carrier delivery or by other means, average no. copies each issue during preceding 12 months: 636; single issue nearest to filing date: 644. (b) Sales through agents, news dealers, or otherwise, average no. copies each issue during preceding 12 months: 0; single issue nearest to filing date: 0. Free distribution by mail, carrier delivery, or by other means, average no. copies each issue during preceding 12 months: 27; single issue nearest to filing date: 27. Total no. of copies distributed, average no. copies each issue during preceding 12 months: 663; single issue nearest to filing date: 671.

GENERAL PARASITOLOGY

By **V. A. Dogiel**

This critical review deals with the general features of parasitism as a biological phenomenon and the origins of parasitism in the animal kingdom. Specific chapters are devoted to the forms of adaptation of parasites, the relationships between parasites and their environment, and different forms of host-parasite inter-relationship. Problems of life-cycles and species, as well as that of speciation with reference to parasites, are discussed. Special emphasis has been placed on recent Soviet research in parasitology.

Veterinarians, zoologists, biologists, biochemists, and organic chemists at both student and research level will find this volume invaluable in their work.

CONTENTS:

PARASITISM, ITS DISTRIBUTION AND ORIGIN
The Concept of Parasitism and Parasites. Symbiosis and its Relationship to Parasitism. Types of Host-Parasite Relationships. Distribution of Parasitism in the Animal Kingdom. Hyperparasitism. The Origin of Parasitism. Modes of Parasitic Invasion.

ADAPTATIONS IN STRUCTURE AND LIFE CYCLES OF PARASITES
Morphological Adaptions of Parasites to their Mode of Life. Adaptations in the Embryonic and Larval Stages of Parasites. Reproduction, Life-Span and Developmental Cycles of Parasites. Intermediate and Carrier Hosts and the Problem of their Origin.

PARASITE FAUNA AND ITS ENVIRONMENT
The Parasite Fauna, the Age of the Host and the Season of the Year. The Parasite Fauna, the Food and Mode of Life of the Host. The Parasite Fauna and the Migrations of the Host. The Parasite Fauna, the Abundance and Mode of Life of the Host. Exchange of and Liberation from, Parasites. The Parasite Fauna and the Geographical Factors. Parasitological Evidence for Solution of some Problems of Zoogeography and Phylogeny. Interrelations between Members of the Parasite Fauna. Parasites as Members of Biocoenoses. Influence of Human Activity on the Parasite Fauna of Animals.

HOST-PARASITE RELATIONS AND THE PROBLEM OF SPECIES IN PARASITES
The Influence of the Parasite on the Host. The Host's Reaction to Parasites. Immunity. Host Specificity and the Problem of Species in Parasites.

INDEX OF LATIN NAMES.

Beryllium-Its Industrial Hygiene Aspects

Edited by **H. E. Stokinger**

Toxicology Section
Division of Occupational Health
Public Health Service
Cincinnati, Ohio

Prepared under the direction of the American Industrial Hygiene Association

This volume gives a detailed account of how beryllium and its compounds may be handled safely and of what engineering controls are needed in each operation or circumstance. Medical, biological, and chemical contributions by authorities on the hygienic aspects of beryllium add to the knowledge and understanding of this metal and its toxic properties. Because proper sampling and analysis are important parts in the hygienic control of exposure, detailed procedures are recommended for the former, and appropriate analytic methods have been critically selected and commented upon for specimens of both atmospheric and biologic origin.

CONTENTS:
